Professional agent **for removing uncured polyurethane foam**

Product code	EAN code	Kind	Quantity / Volume	Application	Foam condition	Version	Package	Outer carton
A1530	4742205009841	CAN	500ml	INJECTION GUN	UNCURED	FOAM CLEANER	1 pcs.	12 pcs.

#### MATERIALS:

- **Colorless** agent
- Manufactured on the basis of acetone, highly toxic.

#### RECOMMENDATIONS:

- Use for removing foam from clothes, tools, foam cans, injection guns immediately after use, and surfaces dirty with uncured foam
- Before use, test the invisible part of the cleaned surface due to the risk of permanent damage (tarnish, discoloration)
- Before use, shake the can with agent vigorously at least **20 times**
- Apply the agent on uncured foam using a dosing nozzle, taking care on other surfaces and then remove softened foam
- When cleaning injection gun, place the can with cleaning agent on the injection gun and clean it by pressing the trigger until the foam stops flowing out. The gun shouldn't be directed towards other people when cleaning
- Exercise extreme caution. The product contains flammable gases
- Detailed information on storage, transport and safety are available in the safety data sheet (SDS).
